## EXPERIENCE

**WriterDuet**                                            Software Developer
                                                         **Aug 2022 – Dec 2023**

- Developed, maintained, troubleshooted, debugged and deployed production code for interactive web and mobile applications using React.js / React Native, Expo, TypeScript, JavaScript, jQuery, Firebase and MaterialUi
- Designed and implemented UI components based on functional requirements of the users across different platforms (web, iOS, Android) in collaboration with a team of developers and UI/UX designers
- Enhanced and adapted the React web application by integrating React Native and Expo components, ensuring compatibility between the React Native code for iOS/Android devices and the web application
- Worked closely with the Quality Assurance team to quickly debug, fix and redeploy applications during test runs
- Set up a Progressive Web App (PWA) and Web Workers for offline functionality of the web application
- Built and found ways to manipulate and convert audio, image and text files into variety of formats to maintain flexibility of use on different platforms
- Set up A/B testings that helped discover nonaggressive ways to encourage customers to buy paid premium subscriptions, which increased company's profit by approximately 10%

**H&H Printing**                                          Graphic Designer
                                                         **Jul 2014 – Mar 2017**

- Created and delivered ready to print designs for storefront windows, light boxes, brochures, books, book covers, board games built using Adobe Photoshop and CorelDRAW
- Held meetings with clients to fully understand their needs and excellently meet their standards

## PROJECTS

- **FLIX -** Netflix clone built with NextJS, Typescript and Tailwind. Backend API built with Node and Express. Implemented TMDB API and Youtube embedded videos for showing trailers, JWT and cookies for authorization
- **ReadThrough -** Finished this project's mobile development and prepared it for deployment to App Store and Google Play Store while working at **WriterDuet**. React.js / React Native app that voices scripts.
- **DevConnector -** Social network built with Node, Express, MongoDB and ReactJS. Implemented user authentication via Json Web Tokens. Front end state management handled by Redux. Pages handled by React Router
- **Template Builder -** Desktop application created for an insurance claim team to speed up writing claims by using prewritten customizable docx templates.. Built with Electron.js for macOS and Windows.

## EDUCATION

- **General Assembly, New York**                         **Jan 2021 - Apr 2021**
  Software Engineering Immersive Bootcamp Certificate of Completion
- **Kherson National Technical University, Ukraine**      **Sep 2013 - May 2018**
  Bachelor's degree in Marketing

## CERTIFICATIONS

- **AWS Certified Cloud Practitioner -** Amazon Web Services (AWS)
